Custom Gauges

Platinum Series Controls

Designed to be ergonomically comfortable to the operator while being lighter and more compact for fitting into tight spaces. The Platinum Series is finished with a two coat process which prevents corrosion and can be configured for single or multiple engine's for Drives, Transmissions, Jet Drives or Buckets.

Available in three throttle/shift configurations:

- **Fully Mechanical**
- **Fully Electric**
- **Mechanical/Electric (Hybrid)**

Configurations include one or any combination of the below:

- The use of mechanical 33C or 43C cables for mechanical levers
- Electric configurations use compact direct driven angular sensors, 0-5 Volt electronic sensors or a PWM signal
- The use of a micro switch - for electronic transmission shifting
- Single, twin and triple in-handle trim switch available
- Check with the engine manufacturer or Livorsi Marine for electric control compatibility

Arched

Billet

Standard

Fully Mechanical Billet Throttle Control with Contour base in Carbon Fiber

Check with the engine manufacturer or Livorsi Marine for electric control compatibility.

Livorsi SmartCraft® DTS

Digital Throttle & Shift

These DTS controls are smaller and lighter: constructed of stainless steel and billet aluminum for years of dependable service. The user has the ability to adjust tension for each handle. The ergonomically designed knobs feature your choice of single or twin drive trim switches or momentary up and down switches.

- A license from Mercury allows Livorsi to combine DTS technology with the options and quality of Livorsi controls
- Designed for direct drive of the triple redundancy position pots
- Eliminates the need for mechanical cables
- Engineered for smooth shifting and throttling
- Single, twin, triple, and quad control configurations are available in a variety of styles and colors.

Compatible with:

- Mercury DTS equipped engines
- Verado 150 - 400 SCI
- Mercruiser 5.0L - 8.2L
- Optimax 225
- Mercury Racing 520, 565, 1100, 1350, 1650
- and Cummins engines that are DTS capable

QR Series™ DTS Billet Controls

Introducing **Livorsi Marine's New QR Series™** throttles (Quick Response) designed specifically for all Mercury compatible DTS engines. These ergonomically designed knobs are very comfortable on the palm of your hand for long periods of throttling. The shorter levers and throw of the **Livorsi QR Series™** make this control great for tight dash spaces and aggressive throttling. With up to 3 trim switches integrated into the knob, your hand never has to leave the control. Electronic shifting and throttle make it easier to maneuver in tight docking spaces. Create your own color combination to make this control look and feel like a custom built control. Available in single and twin engines.

Features

- Available with 1, 2 or 3 switches in knobs for trimming tabs, drive, jack plates or a function of your choice.
- Standard color is Chrysler Chrome* with your choice of 10 other brilliant powder coated colors on knobs and base.
- Tube is integrated into the handle. No exposed tube for trim switch wires.
- Base plate has no screw holes exposed for a clean hi-tech look.
- Available in single and twin configurations
- DTS controls work on Mercury and Cummins DTS ready engines only.
- Easy adjustments for friction and detent. No need to remove control to adjust.

*Chrysler Chrome is a Livorsi bright chrome billet aluminum process with double the chrome thickness and nickel to make this billet QR Series control impervious to salt water corrosion.

Electronic Sidemount Controls - Livorsi Design Capabilities

The electronic controls shown below are designed for specific OEM builders and cannot be sold at the retail level. We show these products here to highlight our design capabilities.

If you are an OEM and you require a new control for your application, please call or email us. We welcome the opportunity of designing a product for you.

Livorsi EMC Controls (Electronic Throttle & Mechanical Shift)

- Uniquely designed for engine applications that utilize electronic throttle control yet require a cable to shift the transmission, drive, or outboard
- Throttle - Features a dual redundancy potentiometer that is fully programmable, allowing you to customize the amount of throttle output throughout the entire range
- Shift - Compatible with 33C or 43C cables

Livorsi EEC Controls (Electronic Throttle & Shift)

- Fully electronic controls that provide a smoother and safer ride with lightning fast shifting and throttling at your fingertips
- Throttle - Features a dual redundancy potentiometer that is fully programmable, allowing you to customize the amount of throttle output throughout the entire range
- Shift - Military grade switches provide reliable gear position feedback to the engine controller
- Push button for throttle only mode with LED indication

Both Versions Feature:

- Adjustable friction settings for throttle and shift detent
- Single or twin trim switches available to actuate wake tabs or drives
- Constructed to exceed ABYC standards
- Compatible with PCM, Ilmor and Indmar engines that support electronic throttle and shift control

Livorsi Marine provides customized controls to a number of builders:

Electronic Foot Pedals - Livorsi Design Capabilities

The electronic controls shown below are designed for specific OEM builders and cannot be sold at the retail level. We show these products here to highlight our design capabilities.

If you are an OEM and you require a new control for your application, please call or email us. We welcome the opportunity of designing a product for you.

- Currently designed to control marine engines that utilize electronic throttle control
- These pedals may be calibrated for MEFI5 and 6 engines
- This completely electronic design eliminates problematic cables from bow to stern
- A sensor is used to send throttle position information from the pedal to the ECU on the engine
- Fully sealed to IP68 specifications, this sensor is waterproof and highly durable
- Plug and play waterproof Deutsch connectors simplify installation
- Solid rugged design, made of billet aluminum with an anodized finish to prevent corrosion
- Aggressive anti-slip features are built right into the pedal for confident non-slip throttling
- Private Labeling available

Custom Wire Harness Solutions

Livorsi is ready to meet your short to medium run mechanical and electrical cable assembly requirements.

- Engineering design support to help maximize efficiencies
- Electro-mechanical assembly, process development, fabrication and testing
- Semi-automated wire and cable cutting and stripping for quick change-over
- Ultrasonic wire welding
- Semi-automated terminal crimping
- Custom wire labels to identify individual wires; decreases assembly time and errors
- Soldering

Livorsi utilizes state-of-the-art equipment from top manufacturers like Komax, Stapla, Cami and Shimpo.

Cutter/Stripper

Cuts and strips wire and cable to precise programmed length.

individual wires · multi-conductor cable · wire braid · phone wire · full strip · half strip · partial strip

Wire Terminal Crimper

A semi-automated machine that provides precise and consistent compression of wire terminals, ensuring accurate in-process crimp height, crimp force and strips. Terminal types include: Molex · AMP · Deutsch · Hirose · Others

Ultrasonic Wire Welder

Helps reduce design time and component costs by integrating 100% quality monitored ultrasonic splice welded wires into your wire and cable harnesses. High electrical integrity with strong metallurgical bonds ensures a reliable connection between various gauges of wire.

Komax BT 722 wire terminal crimper with crimp force technology

In addition to in-process quality assurance, we perform 100% quality control final testing on all wire harness assemblies.

- Cable Eye Testing
- Pull Force Gauge
- LCD Video Microscope
- Value Added Wire Assembly

We can supply all harnesses needed for your OEM boat applications.

Mechanical Sidemount Controls

Mechanical Sidemount Features

- Now with a shorter throw - 180 degrees
- Supports outboard and sterndrive configurations with 33C cables
- Built in single trim switch controls drives, tabs wake plate, etc.
- Adjustable friction settings for throttle and shift detent
- Pull up collar design prevents accidental reverse or forward engagement
- Center button disengages shift for throttle only mode
- Available in all the standard Livorsi colors
- Custom colors available upon request

Industrial Series

Analog Gauges

The Industrial series was designed with the industrial equipment, workboats, pleasure boats and vehicles in mind.

Industrial Series gauges are easy to install with the use of plug-in Deutsch connectors that significantly decrease rigging time. The plug-in connectors are waterproof and resist salt corrosion and dust intrusion.

These gauges feature fade resistant powder coated pointers; SAE rims in a powder coat finish or in polished stainless steel. These finishes protect the rims and make them extremely resilient in harsh weather environments.

Industrial Series Features

- Standard gauge sizes
- Plug-in connectors are waterproof and resist salt corrosion
- Gauges are encased in non-ferrous hardware
- Red LED lighting is standard
- Available in 12 or 24 volt system
- Powder coated pointers are fade resistant
- SAE rims in flat black, white or stainless steel

GPS Speedometers

Purchase GPS Speedometer only, you get:

- speedometer
- memory recall
- harness for power, ground and back lighting

GPSSQ310X antenna

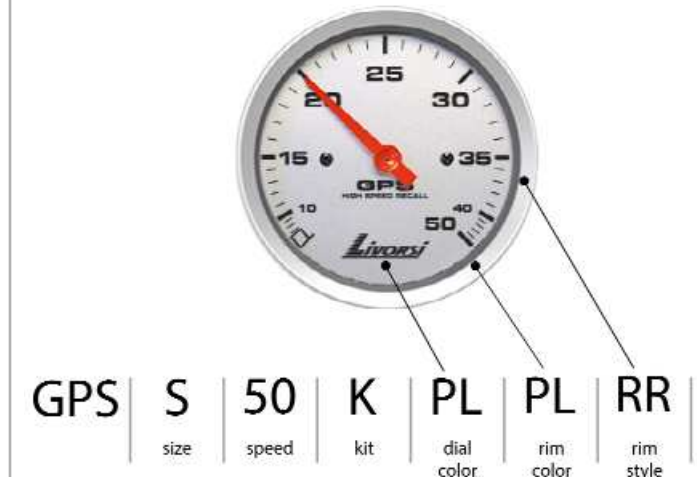

- Mounts with a 1/4" screw
- Dimensions: 2 3/4" L x 2 3/8" W x 7/8" H
- Fast 10 Hz 10x per second update
- 4 ft harness and ring terminals

GPS Speedometer Kit includes

- speedometer
- memory recall
- harness for power, ground and back lighting
- NMEA 0183 antenna - GPSSQ310X

GPS Antennas

GPS Antenna for Vantage View®

Part Number: GPSRAQ3VV

- Antenna is NMEA 0183 compliant
- 2 3/4" L x 2 3/8" W x 7/8" H
- Standard 1-second 1HZ update
- 4 ft harness and ring terminals
- Pre-terminated for quick connection to the Vantage View Master Harness
- It is recommended to use this model number for full compliance with Livorsi Vantage View® speedometers

GPS Antenna

Part Number: GPSSQ3

- Antenna is NMEA 0183 compliant
- 2 3/4" L x 2 3/8" W x 7/8" H
- Standard 1-second 1HZ update
- 4 ft harness and ring terminals
- It is recommended to use this model number for full compliance with Livorsi GPS speedometers
- Compatible with SmartCraft®

GPS Antenna for non-GPS speedometers

Part Number: GPSESQ3

- Antenna is NMEA 0183 compliant
- 2 3/4" L x 2 3/8" W x 7/8" H
- Fast 10 Hz 10x update -8/16 pulse output
- 4 ft harness and ring terminals
- For use with existing automotive or commercial electric speedos (non-GPS speedo heads)

GPS Antenna with 10X per second update

Part Number: GPSSQ310X

- Antenna is NMEA 0183 compliant
- 2 3/4" L x 2 3/8" W x 7/8" H
- Fast 10 Hz 10x per second update
- 4 ft harness and ring terminals

GPS Speedometer w/ Odometer

For automotive or marine applications, this stand alone GPS speedometer is a digital gauge with an analog readout and a built in LCD odometer. Designed to be hassle free, this gauge relies on GPS satellite signals to display accurate speed and miles traveled, so there is no need to calibrate this gauge with gear ratios or tire size.

Gauge Features

- Digital odometer helps you determine your GPM
- Eliminates the need for cables
- No calibration required
- LCD displays odometer and 3 resettable trip odometers
- 10x update for accurate readings
- 120 MPH or 160 MPH

Gauge Kit Includes:

- Gauge head
- GPS antenna with 10 Hz 10x update
- Switch
- Harness
- Mounting hardware

cutout size	overall size
3 3/8"	3 3/4"
4 5/8"	5"

Raw Water Flow System

Safe guard your cooling system from costly damage with Livorsi's Raw Water Flow System

The Raw Water Flow system indicates your engine's water flow volume. This system warns you of a potential problem or danger that would otherwise not be indicated by a water pressure gauge alone, thus preventing cosmetic and structural damage to expensive exhaust headers, intercoolers and other cooling systems.

What is Water Flow?

Water flow is a real indication of water surging through a cooling system such as: exhaust headers, sea strainers, impellers, Gen sets, intercoolers and any other marine or industrial applications that utilize water flow.

Why You Need It

Don't confuse water flow with water pressure; as many OEM engine manufacturers measure water pressure in different areas of the motor. This number may not be telling you the real story of water flow. Your water pressure can be constant from the first day you bought your new boat.

The danger may be lurking in the water flow which could be caused by

- a plugged heat exchanger
- extensive debris build-up in the intercooler or sea strainer
- a kinked hose
- worn impeller
- water pickups not collecting enough water for cooling system

These may be the culprits causing the good water pressure reading, when in actuality there is poor water flow. Low water flow results in; cosmetic and structural damage to expensive exhaust headers caused by burned impellers and/or the clogging and damage of intercoolers or strainers.

The Raw Water Flow System prevents this from happening

Raw Water Flow System

How It Works

Calibration is set at idle and at wide open throttle (WOT). This will generate the cooling system's normal operating range. When water flow rises or drops more than 20% from that range (regardless of RPM), it will trip the alarm illuminating the built-in LED light; an optional audible alarm may be added. The LED light shines with intensity, making it visible in direct sunlight.

Easy to Install

This kit is easy to install, Livorsi Marine offers three Tee sizes to fit your system. Mount the Tee in-line on the output side of a sea strainer or sea pump. The paddle wheel sensor installs in the Tee sending information to be processed on a circuit board that is mounted behind the dash panel. The wheel paddle can be easily removed for inspection and locks back into place once finished. This system trouble-free to install and with little maintenance to perform.

Raw Water Flow system consists of:

- 2 5/8" panel mounted gauge with internal warning light
- Bronze Tee
- PCB board
- Harness
- Paddle wheel transducer

Can Bus Gauges

For
SmartCraft®,
NMEA 2000®,
SAE J1939 and
GM MEFI engines

The Vantage View® system comprises of a Master Tachometer that reads information directly from the ECM/ECU. The Master Tachometer contains a LCD screen in which the user is able to view the performance data, Faults and Warnings of the boat or vehicle. All Vantage View® gauges utilize 270° digital stepper motors that accurately display data in real time. While these instruments are digital, they were designed with the traditional styling of analog gauges. Fluorescent fade resistant pointers and large bold graphics make these instruments easy to ready at a glance.

User programmable warning alarms, simplified rigging and rugged construction makes this line of instruments an exceptional tool for monitoring the performance of a vehicle, workboat or powerboat.

Each engine requires its own Master Tach and daisy chains to slave gauges

- Each LCD displays up to 10 engine functions such as water temp, oil press, GPH, etc.
- Designed to work with SmartCraft®, NMEA 2000®, SAE J1939 and GM MEFI protocols
- For automotive, industrial or marine applications
- Control module may be mounted in location of your choosing to navigate through the LCD screen
- Available in sizes 2, 3, 4 and 5"

Carbon Fiber and Silver Carbon Fiber dials

We've added the popular carbon fiber and silver carbon fiber dial option to our Vantage View gauge series.

Vantage View®

Four Function Gauge

The 4-in-1 gauge saves you dash space by combining 4 essential functions into one 5" gauge: oil pressure, water temperature, volts and fuel level.

Speed

Vantage View® reads both CAN (NMEA 2000® and SAE J1939) and serial (NMEA 0183) based speed inputs.

Programmable Alarms

In addition to factory set Fault and Warnings, users can tailor up to 15 alarms to their individual needs. When triggered, pop-up alerts appear on the LCD screen and the bright LED warning light illuminates on the corresponding slave gauge.

Pop Up Alerts

Enabling of popup alerts for faults, warnings or alarms provides a highly visible alert screen when a fault, warning or alarm occurs. Popups may be enabled for engine trim/tabs brings up a trim detail screen when a change in trim position occurs. Vantage View® even displays Engine Diagnostic Codes for J1939.

Faults and Warnings

Vantage View® alerts you of Faults and Warnings with blinking icons on the Master Tachometer LCD screen. Faults are a problem reported by the ECM/ECU that warrants stopping the engine. Warnings alert you of potential problems as reported by the ECM/ECU.

Fuel Tank and Engine Trim Calibration

The Vantage View® system is the ability to calibrate the fuel tank and engine trim, ensuring utmost accuracy. The Master Tachometer can monitor up to two fuel tanks with the option to use an analog signal or CAN Bus information. The Engine Trim feature also allows for one analog or one CAN Bus signal.

Vantage View®

Slave Speedometers

60 MPH

80 MPH

100 MPH

120 MPH

The speedo receives data from the Master Tach which can be from the following:

- CAN message
- Paddle wheel
- GPS signal- uses the A/D digital input available on the Master Tach.
The GPS source must be wired to the proper pin of the 12 pin connector of the Master Tach.

Both the paddle wheel and GPS antenna must be NMEA 0183 compliant.

Note: Vantage View requires the use of GPS antenna part number: GPSRAQ3VV.
Other GPS antenna models may not work with Vantage View.

160MPH

Description	Part Number		
	3 3/8"	4 5/8"

80 MPH	VJS80	VJL80	
100 MPH	VJS100	VJL100	
120 MPH	VJS120	VJL120	
160 MPH	VJS160	VJL160	
180 MPH	VJS180	VJL180	
GPS antenna for Vantage View	GPSRAQ3VV		

FWA Gauge

This gauge provides five discrete illuminated visual indicators and multiple outputs. Outputs include a dedicated audible alarm and one set of relay output contacts for secondary alarms or additional engine protection devices.

This FWA gauge is needed in order for Vantage View® to receive built in Faults and Warnings from Cummins Diesel engines when a Diesel View display is not present.

FWA gauge will work on all engine protocols except for Mercury Gas SmartCraft® engines.

Available with a black dial only. 2 1/8" cutout

Description	Part Number

Vantage View Slave Gauges

- Slave gauges must be connected to the Master Tachometer via the slave harness daisy chain
- 270 degree sweep with digital stepper motors
- LED warning lights illuminate when programmed alarms are triggered (setup through the Master Tachometer)
- Fluorescent orange pointers
- Back lit with red LED lighting

Visor Rims

Livorsi Visor Rims instantly adds character and dimension to your existing dash. Made of polycarbonate material with a beautiful chrome finish, tough enough to withstand salt water conditions. These rims are made to fit gauges with SAE or low profile rims.

NOTE: Will not work over Mega or Race rims without alterations made by Livorsi Marine, Inc.

- Fits gauges with SAE rim or low profile rims
- Rotate at any angle for the desired look
- Directly attaches to the gauge, screws included
- Corrosion proof PC/ABS construction
- Chrome finish only

Fits gauges with	Part Number
2 1/8" or 2 1/16" cutout	VR218CH
3 3/8" cutout	VR338CH

The visor Rim attaches by slipping the rim from the front of the gauge and slipping the bracket from behind, secure the bracket to the rim with screws and your done.

Fuel and Water Level Senders

An electronic sender suitable for gas, diesel and water.

- Constructed to meet/exceed all applicable ISO, NMMA, ABYC and USCG standards
- Standard SAE 5 hole pattern
- Constructed of 316 stainless steel
- Fully insulated to protect against voltage inside the tank
- The float is the only moving part of the sensor minimizing mechanical failure

How It Works

Measurement is achieved by a series of reed switches positioned inside the level tube. The float with built in magnets then triggers the reed relays generating a potential - free resistance with an ohm value that increases or decreases.

240-33 ohms Sender Length	Part Number
4 inch	SFW4

Mercury In Line Gateways

The new Mercury Gateway converts SmartCraft® engine and system data to NMEA 2000® protocol for use on non-Mercury gauges and displays such as our LED Position Indicators.

Note: Gateway will not provide operation power for devices on the NMEA 2000® network.

Included with Gateway

- Module
- 4 mounting screws
- N2K Tee
- installation instructions

SmartCraft MercMonitor

featuring Mercury® Gateway

MercMonitor featuring the Mercury® Gateway converts SmartCraft® engine and system data to NMEA 2000®/J1939 protocol for use on NMEA 2000®/J1939 multi-function displays and gauges. The ECO-Screen feature constantly monitors engine RPM, boat speed, fuel consumption and engine trim[‡] to automatically calculate and guide you to your best fuel economy settings. No calibration required.

Data Gateway (Automotive/Marine)

With the Livorsi Data Gateway you can export CAN (Controller Area Network) engine data to a NMEA 2000® device and display engine data. For use with Vantage View® gauges or a NMEA 2000® navigation device such as Garmin, Lowrance or Raymarine. Please note that engine data is only transmitted if there is a sensor to support it.

Use this gateway to translate information to our state of the art Vantage View® Gauges.

Livorsi's Data Gateway simply plugs into a standard NMEA 2000® Tee connector which can be hooked directly to your device. On the engine side it will interface via CAN+ / CAN- wires to gather the info and send it off to a screen and or gauges.

Possible Configurations

Gateway Model Description	Part Number
MEFI to NMEA2K	LGM4N2K
J1939 to NMEA2K	LGJN2K
MoTeC to NMEA2K	LGMN2K
OBD2 to J1939 (GM only)	LGOBDJ
Harness	
Deutsch/Micro C, 36 inch harness	GATEWH

Data Gateway (Automotive/Marine)

Your engine application may or may not output all of the parameters listed below. Contact your engine manufacturer for a detailed list.

NMEA backbone cables, T fittings and power cable may be required if you are not tying into an existing backbone.

Please note that a terminating resistor is required for the system to perform as designed.

Please see page 60 for harness accessories.

Hydraulic Billet Trim Tabs

Available with:

- **Custom Logo**
- **LED Underwater Lights** (4" or 6" lights in white, blue, red or green)
- **9 Powder Coat Colors**

Hydraulic Billet Trim Tabs

Features

- For use on boats 20 - 50 feet
- Mil-Spec hard coat anodized topped with a powder coat finish to prevent corrosion
- Choose between LED electronic position indication (plug and play) or mechanical position indication (uses 33C cables)
- Electronic models are compatible with NMEA 2000® compliant systems and Mercury VesselView®
- The electronic IP68 sensor plugs directly to Livorsi's LED Position Indicator
- Tabs are CNC machined from billet aluminum, no casting
- Bolt patterns include Mercury and a smaller Livorsi bolt pattern for center consoles
- All hinge pins and hardware are stainless steel
- Adjustable transom angles without the use of special tools
- Hydraulic cylinders are designed for 1500 PSI working pressure with dual seals, cylinders may be serviced
- Five anodes for complete saltwater protection
- Available in 11 powder coat colors and private labeling
- Models are available for performance boats, center consoles, cruisers, run-abouts, workboats and military boats

1050 Trim Tab model show here

Hydraulic Billet Trim Tabs

Trim Tab Kits include:

- Two billet tabs
- Two pumps
- Mounting hardware
- Harnesses
- Thru hull fittings

Newly designed Parker Pumps
(Made in the U.S.S.)

Compact design to fit small
spaces (8.5"W x 1.5" H)

Stainless steel braided hoses are purchased separately. Four hoses are needed for one kit, two per cylinder.

Adjustable Position LED Indicators

Displays position for tabs, drives, jackplates, rudder indicator, fuel and water level

Compatible With:

- NMEA 2000® (Rx + Tx) Devices
- J1939 (Rx + Tx) Devices
- Resistive Sensors (ohms)
- SmartCraft® (with Gateway)
- 0-5 Volt Sensors

What sets these displays apart from anything else is the single middle green LED. During calibration, this LED display can be set to indicate 50% of actuator travel, fuel level or whatever you are monitoring.

What makes it so special is that it allows you to establish the optimum running angle - or sweet spot (not at 50%), to dial-in the vessel for optimal running efficiency so the novice boater always runs at the correct trim.

No matter what information you are looking to display (fuel level, drive trim, tab position, etc.), the data is brought into the communication network with plug and play harnessing and is received (Rx) via the network cable to the LED indicator for display.

The LED indicator can also transmit (Tx) this information via CAN bus to other compatible displays such as Garmin, Lowrance or Raymarine via NMEA 2000®, SmartCraft® (with Gateway) or J1939 protocols.

Adjustable Position LED Indicators

If your boat is already transmitting (Tx) NMEA 2000® data (tabs, drives, fuel level, water level, rudder angle, etc.), simply plug the indicator into the NMEA 2000® backbone to begin displaying the desired feature on the indicator.

Adjustable Position LED Indicators

- Simple plug and play installation, eliminates clumsy cables
- No cables means, no loss of motion
- All electronics are environmentally sealed
- Has the ability to compensate for non-linear tanks giving you accurate readings
- 0-5 volt or resistive type sensors (adjustable)
- 1 to 4 slot configurations, vertical or horizontal

Dimensions

1 or 2 slot indicator: 2 5/8" W x 5 3/16" H overall
requires (2) 1-1/4" cutouts for wiring

3 or 4 slot indicator: 4 1/16" W x 5 7/16" H overall
requires (4) 1-1/4" cutouts for wiring

Power Supply

Input supply voltage of 12 VDC with reverse polarity protection

Calibration

Calibration is performed via the proximity/photo sensor on the front of the indicator

Inputs may be calibrated using either a 2 or 3 point method:
minimum / maximum – or minimum / maximum / center
running point (green LED)

This indicator has the ability to compensate for non-linear tanks (fuel or water), giving you accurate readings

Adjustable Position LED Indicators

pointer style

fill bar

LED Lighting Options Include:

Pointer Style-

one LED pointer displays your position/level

Fill Bar type-

multiple LEDs lit in a row, beginning from the top or bottom

The green LED in the center may be calibrated to show optimal level position for Drives, Tabs, etc.

The red LED at the bottom of the indicator can be used as a warning light

Built-in light sensor automatically adjusts to ambient light with 250 brightness intensity levels

Analog Inputs

Each slot accommodates two analog inputs. One analog input drives the indicator bar, the other drives the optional red warning LED located at the bottom of the slot.

Warnings may include (but are not limited to):

Oil pressure, water temperature or low fuel with optional switch to close sensor.

Adjustable Position LED Indicators

Voltage or Resistance Sensors

Tabs, drives, jack plates, fuel level, water level and rudder indicator applications must have a resistance or voltage type sensor present for this system to operate. Below are some of the options.

Mechanical to Electric Converter 0-5 Volts
(cable not included)

Converts the mechanical signal to an electric signal. Bolts on the inside of the transom with a short cable to the unit.

33 Series Cables

3 ft	CA3
4 ft	CA4
5 ft	CA5
6 ft	CA6

Mounted pot on Mercury trim tab 0-5 Volts

Tabs 2010 or newer should contain the 5 volt sensor
Tabs 2006-2010 model Number's 280S and 380S should have a bracket to add the sensor

Fuel or water level resistive type sensors 240/33 ohms

NOTE: Must know at time of placing your order, if sensor is a 2 or 3 wire sensor

Retrofitted tabs
Mercury pot 0-5 Volts

Please contact your nearest Mercury dealer.

Mercury drive pot 0-5 Volts

Hatch Actuators

- Safe working load limit of 400lbs.
- Heavy duty sealed ball bearing motor allows for locking of hatches, so it won't open at high speeds
- Marine grade stainless steel housing
- Lifts 2X as fast and has 2X the power of other electric actuators
- Cleaner and more cost-effective alternative to hydraulic and pneumatic models
- Provides consistent performance throughout its lifetime
- 12 VDC

Underwater LED Lighting

These rugged lights beautifully light up the water around you creating a stunning aura; they have even been known to attract sea life. For use on boats and docks.

LED's are designed to have a long life span and these provide over 40,000 hours of light. Built with internal self protection circuitry, these lights will not burn you or your gel coat. This product uses water to cool, but are engineered to and tested to run continuously and safely out of the water. Lights will automatically turn off when it reaches its max temperature and then automatically turn back on after it cools.

LED Features:

- High intensity LED lighting
- Surface mount - no major hull penetration
- Fully Submersible - water cooling required
- 316 stainless steel with polycarbonate lenses
- Long life- LED lamp life over 40000 hours
- Operating voltage 9 to 30 volts DC - brightness does not change
- Standard wire length - 20 feet
- Internal digital switching power supply
- Self contained, no external driver to install
- Rugged design
- Low power consumption
- Internal surge suppression
- Internal temperature protection

LED Navigation Lights

shown closed
with optional cup

Pop Up LED Bow Light

- Port and starboard light in one housing
- Marine grade 316 stainless steel
- Folds down flush when closed
- USCG approved for 2 nautical miles
- LED lights stay cool to the touch
- Optional cup for water run-off
- Light with cup measures 3 1/4" deep
- Light has 3 1/2" diameter cutout

Description	Part Number
bow light	LEDPUBL
water run off cup	LEDPUBLWC

Flange Mount LED Lighting

- Not certified for use as navigation lights
- Housing is machined from billet aluminum
- Environmentally sealed
- Bright LED can illuminate engine compartments

Description	Part Number
red	LEDR
green	LEDG
white	LEDW

LED Navigation Lights

These Livorsi LED nav lights only consume 1/10th of an amp at 14 volts. This means a longer life and less rigging time replacing lights. These lights are to be used on any vessel up to 65 feet and have a visibility of 2 nautical miles.

Designed to be mounted on a vertical surface, to allow the light pattern to be unobstructed from view.

- Visible for 2 nautical miles
- For use on boats up to 65 feet
- Marine grade 316 stainless steel
- Available for 12 or 24 volt systems
- Completely waterproof, environmentally sealed
- NMMA accepted
- USCG approved for 2 nautical miles
- Meets ABYC standards

Description	Part Number
port - red	LEDNL2R
starboard - green	LEDNL2G
adapter plate	LEDNLAP

LEDNLAP
8" L x 2 1/4" W x 1/16" thick

ABYC Section A-16: The starboard sidelight showing green, and the port sidelight showing red, from dead ahead to 22.5° abaft the beam ($90^\circ + 22.5^\circ + 112.5^\circ$) on their respective sides.

Mounting angle for navigation lights is 24° relative to centerline of boat.

CMI's Sound Elimination Mufflers

High Performance

CMI Sound Elimination Systems mufflers offer proven sound reduction technology that enables boaters to operate their performance boats in areas where sound emissions are restricted. This system should reduce sound emissions to levels as low as 85 decibels (dB) in many applications, which is below most sound emission regulations. The mufflers are engineered to reduce sound without restricting the exhaust or creating unwanted backpressure, which can inhibit the engine from reaching peak performance power.

Clamp-On

Transom Mount

- Mufflers can be installed on any exhaust system with tailpipes ranging from four to six-inches in diameter, which covers the full range of inboard or stern drive-powered recreational and performance boat applications up to 1200 horse power.
- CMI Sound Elimination Systems mufflers are made from 304 series stainless steel, and have fewer moving parts than competitive models to ensure long-lasting durability and reliability for nearly any application.

Clamp On High Performance

Terms and Conditions

Livorsi Marine, Inc.
TERMS & CONDITIONS 2016

WARRANTY

All Livorsi Marine® products carry a limited one year warranty for repair or replacement at Livorsi's discretion. All Livorsi Marine® products are warranted to be free of defects in material and workmanship. Users/Customers of Livorsi Marine®/Livorsi® products agree not to hold Livorsi Marine, Inc., its owner or employees responsible for any damages occurring by improper installation or use of Livorsi Marine® or Livorsi® products. The company, owner or its employees will not be liable for more than the cost of the original product and in no event will Livorsi Marine® or Livorsi® be liable for special, indirect or consequential damages of any kind whatsoever.

RETURNS

All returns purchased directly through Livorsi Marine must have an assigned RMA Number (Returns Merchandise Authorization). Please call customer service at 847-752-2700 or email returns@livorsi.com to receive an RMA Number. Please allow at least 24 business hours for a return call or email. Any packages without a RMA number will be refused. For warranty questions please call customer service at 847-752-2700 or email returns@livorsi.com. Livorsi Marine will not accept returns or warranty items unless purchased directly from Livorsi Marine. For items purchased through a distributor or dealer, call the distributor or dealer for return or warranty questions and issues. For further questions or technical help visit www.livorsi.com and click on Tech Tools or call customer service at 847-752-2700

A minimum 15% restocking charge may apply to any returned items. Merchandise must be returned with shipping charges prepaid. Returns sent freight collect will be refused. Please enclose a copy of the original purchase invoice with return. Livorsi Marine, Inc. will not accept returns past 60 days. Credit will not be issued on custom or private label gauges. If a product returned to Livorsi Marine is tested and found to have no defects, the customer will be responsible for 20% restocking fee and replacement shipping costs if applicable

PRODUCTS

Due to changes in technology, customer demand and company direction, products may change without notice. Check our website for updated products and availability. Regardless of our line of products, our goals remain the same: QUALITY, OPTIONS AND AVAILABILITY!!

PAYMENT TERMS

Individuals may pay by Visa, MasterCard, American Express, Discover or cashier's check. Companies may pay by Visa, MasterCard, American Express, check, C.O.D., wire transfer or on Net terms with prior credit approval.

PRICES

All prices are subject to change without verbal or written notice. Our price lists are intended as a guideline only. No responsibility is assumed for errors or omissions on product or pricing information. Possession of discount price list does not guarantee those prices to customer.

ORDER PLACEMENT

You may phone 847-752-2700, fax 847-752-2415, email sales@livorsi.com or mail your orders to Livorsi Marine®, 715 Center Street, Grayslake, IL 60030. You may also e-mail your order to sales@livorsi.com. Please be sure to include your name, address, phone number and specific ordering requests.

FREIGHT

All orders will be shipped UPS or FedEx, unless specified by customer. All orders are shipped F.O.B. Grayslake, Illinois. Any claims for shortage of product must be reported to Livorsi Marine® within 24 hours of receipt of order. If the shipment arrives damaged, contact the shipper directly, not Livorsi Marine®. Do not return damaged product to Livorsi Marine®.

Handling charges are based on the speed and type of shipment requested. i.e. \$5 -ground, \$6- 3day, \$8- 2day, \$10-next day, \$15 International. Drop ship fees may be charged if shipping to an address different from the billing address. An additional charge may be applied if customer requests special shipping company or instructions.

REFUSED SHIPMENTS

Shipments returned to Livorsi Marine® marked "refused" or "not in when driver called" will cause the customer's buying status to be frozen until related handling and shipping charges are paid. Refusal of shipment does not release the customer from paying the related handling and shipping charges. Repeated refusal or returned shipments may cause the customer's buying status to be revoked.
