

Low Lux Night Vision Camera

The new Low Lux Night Vision camera is a safety-device; an enhancement to a boat's radar that provides a clearer image of the waterway around a boat operating at night or in lower light conditions, particularly in a crowded harbor or marina.

BEFORE

AFTER

Low Lux - Light enhancing camera system, giving any level recreational or commercial boater a valuable safety tool for nighttime navigation. Connect to any RCA video jack or to an optional DVR to record.

Portable Mount – (optional) Measuring only 6" in length and 3.5" in diameter the camera is small enough to be stored after usage to prevent theft.

Rugged - Splash proof and damage resistant. Very durable and water tight for on deck mounting locations. Sealed to IP66 standards.

Connect to any RCA video jack or to an optional DVR to record your trip.

Low Lux Night Vision Camera

Added Safety • Affordable • Portable • Rugged

The days of trying to beat the sunset are over. This camera can be used as a stand alone device or an enhancement to radar.
