

# LED Position Indicators

- **Tabs • Drives • Jackplates • Fuel Level •**
- **Water Level • Rudder Indicators •**

- Compatible with NMEA 2000® , SmartCraft® with gateway
- Simple plug and play installation, eliminates clumsy mechanical cables
- No cables means, no loss of motion
- All electronics are environmentally potted
- Indication Options Include:
  - Fill bar type- multiple LEDs lit in a row
  - Pointer type - one LED pointer displays your position/level
- 17 LED lights per slot with a red LED warning light located at the bottom of the slot, which can be used as a warning for resistive type or digital switch senders
- The green LED in the center may be calibrated to show optimal level position (sweet spot) for Drives, Tabs, etc
- Built-in photo sensor automatically adjusts to ambient light with 250 brightness intensity levels
- Has the ability to compensate for non-linear tanks giving you accurate readings
- 0-5 volt or resistive type sensors (adjustable)
- 1 to 4 slot configurations, vertical or horizontal
- Wide input supply voltage of 7 - 24VDC with reverse polarity protection
- Indicators are available in a variety of colors to match your Livorsi gauges and accessories

These state-of-the-art indicators by Livorsi Marine, Inc. are capable of reading CAN Bus protocols such as SmartCraft® (with gateway), NMEA 2000®, as well as 0-5 volt or resistive-type (ohms) inputs.

Indicator configurations are available in 1, 2, 3 or 4 slots in a vertical or horizontal layout and are environmentally potted to ward out the elements.

**Each slot accommodates two analog inputs**

Inputs accepted are either 0-5 volts or resistive sensors. These inputs can be transmitted or received from the SmartCraft® (with gateway) or NMEA 2000® network straight into your Garmin, Lowrance, Raymarine or other LED display.

One input drives the 17 LED indicator bar.

The second input (optional) drives the red warning LED located at the bottom of each slot.

Warnings may include: oil pressure, water temperature or low fuel. A normally open or normally closed warning switch is needed in order to activate the warning light.

- running point (sweet spot)
- warning LED with optional sender
- proximity/photo sensor (calibration "button")

## Voltage or Resistance Sensors

Tabs, drives, jack plates, fuel level, water level and rudder indicator applications must have a resistance or voltage type sensor present for this system to operate. Below are some of the options.

Mechanical to Electric Converter 0-5 Volts  
(cable not included)

Converts the mechanical signal to an electric signal. Bolts on the inside of the transom with a short cable to the unit.

Cables for Mechanical to Electric Converter

33 Series Cables	
3 ft	CA3
4 ft	CA4
5 ft	CA5
6 ft	CA6

Mounted pot on Mercury trim tab 0-5 Volts

Tabs 2010 or newer should contain the 5 volt sensor  
Tabs 2006-2010 model #'s 280S and 380S should have a bracket to add the sensor

See page10 for a list of sensor components

Mercury drive pot 0-5 Volts  
Part Number: 863187A1

Retrofitted tabs-  
Mercury pot 0-5 Volts  
See page 10 for a list of components.

Fuel or water level resistive type sensors  
240/33 ohms.  
Must know at time of placing your order,  
if sender is a 2 or 3 wire sender.

See page 9 for more details

### Calibration

Calibration is performed via the proximity/photo sensor on the front of the indicator

- Inputs may be calibrated using either a 2 or 3 point method:  
minimum / maximum – or minimum / maximum / center running point (green LED)
- Has the ability to compensate for non-linear tanks (fuel or water),  
giving you accurate readings
- Each bar is made of 17 LEDs for high precision resolution (indication)  
of the sensor position/level

Pointer Style

Fill Bar

### LED Lighting Options Include:

Pointer Style-  
one LED pointer displays your position/level

Fill Bar type-  
multiple LEDs lit in a row, beginning from the top or bottom

The green LED in the center may be calibrated to show  
optimal level position for Drives, Tabs, etc.

The red LED at the bottom of the indicator can be used as  
a warning light

Built-in light sensor automatically adjusts to ambient light  
with 250 brightness intensity levels

1 or 2 slot

### Dimensions

1 or 2 slot indicator: 2 5/8" W x 5 3/16" H overall  
requires (2) 1-1/4" cutouts for wiring

3 or 4 slot indicator: 4 1/16" W x 5 7/16" H overall  
requires (4) 1-1/4" cutouts for wiring

3 or 4 slot

### Power Supply

Wide input supply voltage of 7-24 VDC,  
with reverse polarity protection

### Building Your Indicator Part Number

Sensor

Harness Options		Part Number
	Main Harness to Jumper Harness	
<b>2</b>	a Main Harness 20 feet	LEDHSA20
	b Main Harness 25 feet	LEDHSA25
	c Main Harness 30 feet	LEDHSA30
	d Main Harness 40 feet	LEDHSA40
	Jumper Harness to Sensor Input	
<b>3</b>	a Tab/Drive/Fuel Jumper Single 5 feet	LEDHEXTS
	b Tabs/Drives/Fuel Jumper Dual 10 feet	LEDHEXT10
	c Tabs/Drives/Fuel Jumper Dual 15 feet	LEDHEXT15
	d Mercury SmartCraft® Drive Jumper Single (Y Cable) 5 feet	LEDHYS
	e Mercury SmartCraft® Drive Jumper Dual (Y Cable) 5 feet	LEDHYD5
	f Mercury SmartCraft® Drive Jumper Dual (Y Cable) 10 feet	LEDHYD10
	g Mercury SmartCraft® Drive Jumper Dual (Y Cable) 15 feet	LEDHYD15
	Mechanical to Electric Converter 0-5 Volts	call for part number
	Fuel or Water Level Sensors- see page 11	

**NOTE:** Before ordering your Mercury SmartCraft® Drive Jumper harness, first verify which type of drive sensor you have: the 3-wire 0-5 volt sensor or the 2-wire resistive sensor.

16	85486	Screw, .250-20 x .380 stainless steel	2
17	895820T02	Harness assembly	1

Tabs 2006-2010 model #'s 280S and 380S should have a bracket to add the sensor.

**Recommended Fuel and Water Level Sensor**

Be sure to check what type of level sensor is presently installed. 2 or 3 wire sensor. Type must be known at time of placing your order, for proper indicator compatibility.

**Gas, Diesel or Water Level Sensors**

- Suitable for Gas, Diesel or Water
- 316 Stainless Steel
- SAE 5 Hole Pattern
- 240-33 OHMS
- Constructed to meet and/or exceed all applicable ISO, NMMA, ABYC and USCG standards

SFW + length
