# Introducing the all NEW PLATINUM SERIES from Livorsi Marine

Designed to be ergonomically comfortable to the operator while being lighter and more compact for fitting into tight spaces. The Platinum Series is finished with a two coat process which prevents corrosion and can be configured for single or multiple engine's for Drives, Transmissions, Jet Drives or Buckets.

## Available in three throttle/shift configurations:

- **Fully Mechanical**
- **Fully Electric**
- **Mechanical/Electric (Hybrid)**

Configurations include one or any combination of the below:

- The use of mechanical 33C or 43C cables for mechanical levers
- Electric configurations use compact direct driven angular sensors, 0-5 Volt electronic sensors or a PWM signal
- The use of a micro switch - for electronic transmission shifting
- Single, twin and triple in-handle trim switch available
- Check with the engine manufacturer or Livorsi Marine for electric control compatibility
