

Arched Controls with Triple Trim Switch

All hands on throttle with the new Livorsi Triple Trim Switch

- Trim multiple drives, tabs, jackplates or whatever you're heart desires without taking your hands off the throttle
- Styled and designed for comfort, perfect for long boating excursions
- Switches are strategically placed to avoid accidental switch actuation
- Eliminate trim switches on the dash, free up more dash space
- Available for the Arched Throttles only
- Designed for right hand thumb actuation
- When trimming multiple drives, diode kits must be added to order
